Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to Duct Coating Apparatus, classified in class 118, subclass 620.
 - II. Claims 8-15, drawn to Coating Method, classified in class 427, subclass 475.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of group I can be used for another and materially different process, such as washing; etching, etc of ducts, or for coating the interior of hollow articles other than ducts, e.g. pipes, conduits for wires, etc. The Examiner notes that the preambles of independent claims 8 and 12 begin with "A duct seal system..." but these are unquestionably method claims since they contain operative steps rather than apparatus structure. Applicants should consider amending these claims to make this clear.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was not made to Molly McKay on 10-11-05 to request an oral election to the above restriction requirement, because of the issue raised above.

Art Unit: 1762

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
